## Education: -

BML Munjal University, Gurgaon

September, 2022 – June, 2026

*Bachelor of Technology – 7.5 CGPA*

---

## Experience: -

UniSphere, Gurgaon

August, 2024 – Present

Developer - intern

As a Developer for UniSphere, a startup created by some experienced folks from my college, my job is to make the app look and work great. UniSphere isn't just any app—it is changing how students connect with administration department. I focus on making it easy to use and nice to look at, so everyone loves using it.

Delhivery, Gurgaon

June, 2024 – August, 2024

Data Analyst - intern

As a Data Analyst I analysed the employee attendance and the vendor rate for different warehouses of the delhivery and prepared a dashboard to visualise the data outcomes and submitted the report to the Internal Audit team to publish the same in the quarter report of the fiscal year 2024-25 (May-July)

DeployH.ai, Hyderabad

April, 2024 – June, 2024

Jr Engineer – Intern

As a Jr Engineer -Intern for DeployH.ai, I worked on several ReactJs projects but some of them were really exciting like User Dashboard, Admin Panel , Employee management Tool.

UniSphere, Gurgaon

November, 2023 – April, 2024

Developer - intern

As a Developer for UniSphere, a startup created by some experienced folks from my college, my job is to make the app look and work great. UniSphere isn't just any app—it is changing how students connect with administration department. I focus on making it easy to use and nice to look at, so everyone loves using it.

## Major Projects: -

Portfolio Website: MERN

Designed and developed a comprehensive portfolio website to showcase expertise in MERN stack. Seamlessly integrating elements of design and functionality, the website serves as a dynamic representation of professional capabilities, demonstrating a commitment to innovation and excellence in Web development.

To - Do Website: MERN

This project demonstrates my ability to design user-friendly interfaces and implement dynamic features such as task creation, deletion, and updating. By leveraging JavaScript, I incorporated interactive elements to enhance user experience, allowing for seamless task management

Encryption - Decryption: JAVA, Bitwise Encryption

Implemented a file encryption and decryption system using bitwise operations to securely encrypt and decrypt files at the binary level, ensuring robust data protection.

## **Phishing Website Detection: *CYBERSECURITY***

Developed a machine-learning-based model to identify phishing websites by analyzing URL patterns and website characteristics, improving detection accuracy.

**Minor Projects:-** Air Quality Index Prediction, Age-Calculator, Alarm Clock

---

## **Technical Skills: -**

**Languages: -** C++, Python, MySQL, MERN, HTML, CSS, JavaScript

**Tools: -** VS Code, Android Studio, QuickSight, Figma, Jupyter Notebook, TinkerCad, QuickSight, GitHub, CMD, PowerBI

**Technologies/Framework: -** GitHub, BootStrap, ExpressJs, ReactJs, Tailwind CSS

**Operating Systems:-** Windows, Linux

---

## **Achievements:-**

- Operations Lead of TechStrom (Hackathon).
  - Website developer of annual tech fest.
  - Campus Ambassador for Coding Ninja.
  - Secured 4th position at NIT Durgapur Hackathon
- 

## **Interests/Hobbies:-**

- Problem-solving
  - Football
  - Music (Play Keyboard)
- 

## **Certifications:-**

- AI Fundamentals - Microsoft Azure
  - Prompt Engineering - Google Developer
- 

## **Some Course Work: -**

- Data Structure and Algorithm
  - Operating System
  - Database Management System
  - Computer Organisation and Architecture
  - Web Development
-
